

HappyFeet User's Guide

Thank you for purchasing Happy Feet, the foot-mounted, Bluetooth-enabled analog drum machine thingy!

First, let's get acquainted.

Getting Started

1. Connect the USB cable to the charging port and to a USB charger or port on a computer. The red charging LED will light while charging and go out when the HappyFeet battery is fully charged.
2. Once charged, the Bluetooth LED will flash slowly (every 5s) indicating that HappyFeet is advertising on Bluetooth i.e. ready to connect with a phone or tablet.
3. On your phone or tablet, pair with HappyFeet:

Android	iOS
Settings→Connections→Bluetooth→Scan Choose HappyFeet Enter the pairing code: 145145	<insert iOS instructions>

4. Install the HappyFeet app from your app store or the download link on our website.

Play Store	Apple App Store
<insert app store screenshot>	<insert app store screenshot>

5. Open the app. <insert app screenshot>

6. Make a Bluetooth connection by hitting the connect button. When a connection is established, the blue LED will flash faster at a 1s rate. <it may take several tries to connect... bug that needs to be fixed!>
7. The default play mode is "single note" and that note is a bass drum. Turn on beats by pressing the note symbol at the bottom of the screen. This enables HappyFeet to send a Bluetooth message on each beat detected. Once this button is hit, the green LED will flash on each beat detection.

Troubleshooting

Problem	Solution(s)
Won't connect	
Connection drops	
Delay between foot tap and sound	
No sound	The volume is turned down on your phone, tablet.
